

RESOLUTION NO. 151

*Closed out by
Resol # 217 - 4/23/83*

WHEREAS, during the period of August 22-29, 1977; a rain storm of unexpected intensity caused serious soil erosion on the WPPSS Nuclear Projects Nos. 3 and 5 construction site resulting in sediment discharge to Workman, Fuller, and Purgatory Creeks; and

WHEREAS, the Supply System took remedial action and did advise the Council of remedial activities pursuant to General Condition G-27 of the NPDES Permit; and

WHEREAS, the Council ordered remedial actions supplemental to the erosion control program, and did document the actions required in EFSEC Resolution No. 126, dated September 26, 1977, EFSEC Order No. 543, dated November 14, 1977, and EFSEC Resolution No. 147, dated October 9, 1978; and

WHEREAS, construction activities during 1978 and spring 1979 have greatly altered site conditions; and

WHEREAS, the Supply System, by letter dated February 27, 1979 did state that vegetation has been established and water quality data meets the water quality criteria defined by EFSEC Resolution No. 147 in the P-1, P-3, and W-1 drainage areas, and did request permission to remove the P-1, P-3, and W-1 pump stations; and

WHEREAS, the Department of Ecology acting for the Council did review vegetation establishment and water quality data and concurs that these conditions have been met;

NOW THEREFORE BE IT RESOLVED by the Energy Facility Site Evaluation Council that the Supply System may remove the P-1, P-3, and W-1 pump stations.

Dated this 11th day of June, 1979.
