EFSEC  
Stephen Posner, Manager  
PO Box 47250  
Olympia, WA 98504-7250

Dear Mr. Posner:

I am the President of Morgan and Son Earthmoving Inc. I have had several conversations with TUUSSO Energy regarding the potential construction of the Columbia Solar Project and understand that the project will need an estimated 16,000,000 gallons of water for the construction process.

My family has owned this construction company for over 50 years and we have frequently procured water from various municipal sources in Kittitas County, for volumes similar to those needed by TUUSSO. We have purchased large volumes of water for construction projects from these sources, including water for the Kittitas Valley Wind Farm construction process.

Based on that experience, we are comfortable that we can procure water needed for construction and operations from a municipal source with a valid water right for delivery to the project sites.

Sincerely,

**Dan Morgan, President**
