Re: EF-210011

621 Woodland Square Loop

PO Box 43172

Olympia, WA 98504

98504

Write your comment:

I support the Horse Heaven Clean Energy Center for several reasons. The project will help meet Washington State's clean energy transition while creating good paying jobs. In addition, it will contribute \$260M in new tax revenue for our community. I know there has been some public scrutiny, but I believe the majority of people can see the advantages of going forward with this project.

Let's get this project going!

**I support the
permitting of the
Horse Heaven Clean
Energy Center
because:**

- Climate change is threatening our future. Preventing the development of clean energy facilities creates roadblocks to stemming the climate crisis.
- It has been demonstrated that any negative environmental or wildlife impacts from the facility can and will be mitigated.
- Projects like this will be instrumental for Washington to achieve its goal to become carbon neutral by 2045.

External Email

Dear Director Sonia Bumpus,

I am writing to ask that the Final EIS for Horse Heaven Hills Wind Project in Benton County take a stronger and more specific look at how the project can be designed to avoid impacts on the environment.

I support Washington's 100% clean energy target to combat the climate crisis. Audubon's science suggests that we may lose 389 species of N. American birds if warming climbs to 3 degrees Celsius above pre-industrial levels. We are also in a biodiversity crisis. Conservation and clean energy must go hand in hand.

The Horse Heaven Hills Wind Project will be the largest renewable energy project in our state's history. As currently proposed, the project may cause unacceptable harm to state-listed Ferruginous Hawk and create barriers to landscape connectivity for shrub-steppe wildlife across a 113-square-mile area. But the project could be considerably improved with more clarity on conservation measures and an alternative design.

The final EIS must include the following information and analysis to uphold our state's commitment to, and appreciation for, our wildlife and the connected landscapes they need. The final EIS must:

- Identify specific design features, mitigation measures, and associated performance standards that will avoid adverse impacts related to wildlife movement and habitat connectivity within the Project Lease Boundary and at the regional level.
- Commit to how the proposed Project will avoid significant impacts on the Ferruginous Hawk population at the regional level by avoiding turbines within two miles of all documented nests and mitigating for direct and indirect loss of core and range habitat for all nests within six miles of the project.
- Include an alternative for analysis that features an explicit design for and commitment to turbine siting and other project components that minimizes impacts to the state-listed species and wildlife connectivity.
- Use the best available science to evaluate the magnitude and scale of impacts on birds due to turbine operation.

The build-out of renewable energy in Washington can be achieved in a way that honors the legal and sovereign rights of Treaty Tribes and balances the needs of both people and wildlife. We look to this Council and its staff to provide the leadership needed to achieve this vision.

Sincerely,
Mr. Matthew Boguske

Washington state has over 100 miles of ocean coastline with more consistent wind making that a better choice. We do not need a wind farm in the tri-cities or Washington state for that matter. The Northwest Power Council hasn't even signed on for it.

Dear Director Sonia Bumpus,

I am writing to ask that the Final EIS for Horse Heaven Hills Wind Project in Benton County take a stronger and more specific look at how the project can be designed to avoid impacts to the environment.

I support Washington's 100% clean energy target to combat the climate crisis. Audubon's science suggests that we may lose 389 species of N. American birds if warming climbs to 3 degrees Celsius above pre-industrial levels. We are also in a biodiversity crisis. Conservation and clean energy must go hand in hand.

The Horse Heaven Hills Wind Project will be the largest renewable energy project in our state's history. As currently proposed, the project may cause unacceptable harm to state-listed Ferruginous Hawk and create barriers for landscape connectivity for shrub-steppe wildlife across a 113-square mile area. But the project could be considerably improved with more clarity on conservation measures and an alternative design.

The final EIS must include the following information and analysis to uphold our state's commitment to, and appreciation for, our wildlife and the connected landscapes they need. The final EIS must:

- Identify specific design features, mitigation measures and associated performance standards that will avoid adverse impacts related to wildlife movement and habitat connectivity within the Project Lease Boundary and at the regional level.
- Commit to how the proposed Project will avoid significant impacts to the Ferruginous Hawk population at the regional level by avoiding turbines within two miles of all documented nests and mitigating for direct and indirect loss of core and range habitat for all nests within six miles of the project.
- Include an alternative for analysis that features an explicit design for and commitment to turbine siting and other project components that minimizes impacts to the state-listed species and wildlife connectivity.
- Use the best available science to evaluate the magnitude and scale of impacts to birds due to turbine operation.

The build-out of renewable energy in Washington can be achieved in a way that honors the legal and sovereign rights of Treaty Tribes and balances the needs of both people and wildlife. We look to this Council and its staff to provide the leadership needed to achieve this vision.

Sincerely,
Ms. Linda Reilly

We are lifelong residents of Puget Sound. We love our area and want to protect its health.

We are writing to express our support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. We believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology.

With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow.

Thank you for your consideration.

Dear EFSEC:

Tri-Cities CARES (TCC) with the support of the "Save Our Horse Heaven Hills" group was approved as an intervenor in the Horse Heaven Wind project adjudication process.

The Tri-Cities CARES organization has been doing and continues to an exceptional job of representing our local Tri city area communities in the Horse Heaven Wind Project adjudication process.

We want to confirm my/our support for their intervention in the process.

Please confirm receipt and applicability to this project.

Best Regards

Dear EFSEC Director, Sonia Bumpus,

Tri-Cities CARES has been doing an excellent job of representing me and our local communities in the Horse Heaven Wind Project adjudication process. I am pleased with the job Tri-Cities CARES is doing as an intervenor and want to confirm my support for their continued work in this process and not under the Benton County umbrella whose sole issue is land use. My concern is for wildlife, aesthetics, human and domestic animal health, safety, quality of life, lack of local control, diminished property values, etc., which are the focused issues of Tri-Cities CARES. Tri-Cities CARES has my full support in representing me as an intervenor during the adjudication process.

To Whom It Concerns,

For many reasons I object to the Horse Heaven Wind Project. In general I don't believe it is a well thought out energy policy. As a business focused on earnings it takes a very large swath of land which will adversely affect area wildlife and citizens.

I have followed this issue and want to endorse Tri-Cities CARES as my representative in the effort to oppose this wind farm.

Sincerely,

Kristin Anderson, Citizen of Pasco, WA

Dear EFSEC Director, Sonia Bumpus,

I appreciate everything that Tri-Cities CARES has done thus far in representing our community during the adjudication process as an intervenor. Limiting Tri-Cities CARES participation is an insult and is in direct conflict with SEPA and the 2021 State Energy Strategy commitments to public participation. These issues, wildlife, aesthetics, human and domestic animal health, safety, quality of life, lack of local control, etc., that Tri-Cities CARES is focusing on are extremely important to me and many others in this community! Tri-Cities CARES has my full support to continue representing me and the community in which I live as an intervenor. Thank you.

Sonia;

Tri-Cities CARES has been doing an exceptional job of representing local communities in the Horse Heaven Wind Project adjudication process. I want to confirm my support for their intervention in the process.

I have worked in the power industry for over 30 years and will testify these wind turbines are nonsense, ineffective, destroy ecosystems (natural habitats), are costly to operate and simply are not viable as a power source.

They are 100% politically driven and with a very false pretense behind them. Basic science 101 would tell you these turbines are useless.

Sincerely,
Jim Rock

I am a proud supporter of TCC who has shown an amazing determination in representing our community against state authoritarian measures. Our community knows the wind farms are not needed here and data exists to back it up. If Western Washington wants the wind turbines there is plenty of ocean coastline to build them.

TCC and Benton county citizens have a legal right to resist state authoritarian actions without being silenced.

Sincerely,
Michael Kildall

State of Washington Energy Facility Site Evaluation Council
Sonia Bumpus, Director
Re Comments on HORSE HEAVEN Wind and Solar Farm draft ENVIRONMENTAL IMPACT STATEMENT (DEIS)

Hello Ms. Bumpus,

I am opposed to this Wind/Solar Farm for a number of reasons outlined in PUBLIC COMMENTS on the SCOPE of the DEIS I provided back in JUNE 2021. ([Those comments appear in your official COMMENT section as ITEM #2 \(out of 361 comments\) of LINK-- Horse Heaven SEPA | EFSEC - The State of Washington Energy Facility Site Evaluation Council](#))

For your convenience, my comments can be found as follows:

1. CLICK on-- [Combined SEPA Scoping Comments 00001 - 00100](#)
2. Scroll down one page to Comment #2—Craig Brown

These comments included a number of technical/observational reasons why this project should not be approved. I have never received any comments back from your office relative to the applicability and/or technical validity of the points made, which I would appreciate.

I also support the TC CARES group submittals which likewise oppose this project but for different reasons.

Thanks for your consideration of all sides of this issue, which directly affects where I have lived for over 70 years, and where my children and grandchildren now live.

kind regards,
Craig Brown

Hello,

I have been a resident of Tri-Cities, WA (Benton County/South Kennewick) for 25 years and am sending an email of support for the Tri Cities CARES (TCC) organization. I fully endorse TCC as representing my family's interests as residents of the Tri-Cities. I further support their representation to intervene regarding the proposed Horse Heaven Hills Solar/Wind Farm project.

The Tri-Cities would be negatively impacted by the construction of such a large scale solar & wind farm so close to so many residential homes as well as the negative impact on wildlife and migratory patterns of many bird species. I completely trust TCC to represent us as residents of the Tri-Cities in their continued efforts of opposition to this project.

Thank you for your consideration,
Jackie Banning
