Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

Vicky Guyon

The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

Subject: Oil Trains-NO, NO, NO

I and my family do not want oil trains running through here. We do not want any more trains running through period. The noise pollution from them already is horrible. They blow those whistles all the way from the start of town to the end of town and they infiltrate every part of a person's house that is within a mile, especially if you live just a little up the hill from them. That along with the noise pollution that is going to be generated by the new north south freeway intersections is going to make it astronomical. Then you also have the pollution rolling off the cars and the potential for oil spills and explosions killing people and all for a couple of hundred jobs in the outcome for a terminal over on the west side of the state. Again, we get all of the crap and they get the benefit.

No, we do not want this. Take it somewhere else.

Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

Subject: BNSF oil trains, coal trains through Spokane to export terminals

Hi

Not sure who gets this, but the old regulations nineteenth century congresses bought into to get a railroad line across the country are no longer appropriate. BNSF lawyers will be sure to cite them ad nauseam, BNSF can't count!! Several highly populated areas, including Spokane, WA, are at risk of more mishaps the more often trains roll through. I have sat at a Browns Addition** laundromat across the street from Sunset Junction and counted three or more trains in the hour and a half I am there. (of course the frequency varies) This is around noon. I can expect to see an oil carrying train, and a coal train, plus the general cargo trains, and the "who knows what's in there?" trains. I can hear night trains roll by where I live, a mile and a half way. and this is getting more frequent. The other night I wondered what was alarming an engineer who was blasting the whistle for about two minutes on the west side of town to, I assume, get something off the tracks. The Latah trestle is a disaster not waiting to happen, A derailment already occurred a few years back, of a few general freight cars. I kept the photos.

Since BNSF won't cooperate, since antiquated regulations allow them to avoid paying for repairs to infrastructure, the best thing Washington state regulators can do is not allow the receiving ports to be built until (a) the oil and coal train routes go through sparsely populated areas and (b) some routes are not allowed for oil and coal train transport. Might be nice to not send them through the Columbia river gorge either. BNSF officials tout jobs and come up with statistics to support them. Not gonna happen in Spokane!!

Might also be nice if all extractive industries and the transportation infrastructures really accepted that if we humans are gonna mess around in Mama's Kitchen we better keep it from being trashed and clean up our messes. Too bad to shrink that bottom line!! Aw come on, the tax lawyers can figure out a write off!!

** Brown's addition is a high density low income residential area on the western edge of Spokane's downtown. Three BNSF tracks merge there near Sunset Junction.

Thank you

Barbara Morrissey

Subject: Tesoro Savage Petroleum Terminal LLC project.

Dear Mr. Posner:

My name is Charles O'Clair, and I am a San Juan County resident and property owner. Our County relies on our tourism-based economy where our resident orca whales are an economic driver. I am concerned about the potential impacts from the proposed Tesoro Savage Petroleum Terminal LLC in Vancouver to the health of the Southern Resident Orca Whale. Please thoroughly study the following: What would be the adverse impacts from the proposed crude oil transport terminal to the Southern Resident Orca Whales that spend time at the mouth of the Columbia River where it is presumed that they are feeding on upper Columbia and Snake River Chinook salmon? What would be the adverse impacts to Chinook salmon from the construction and the on-going operation of the proposed Tesoro Savage Petroleum Terminal LLC and associated rail lines, docks, ship loaders, storage facilities, conveyors, and equipment? What would be the cumulative adverse impacts to Chinook salmon from all the proposed fossil fuel terminal proposals within the Columbia River? What would be the cumulative adverse impacts to Chinook salmon from the increased vessel traffic associated with the Tesoro Savage Petroleum Terminal LLC and all other proposed fossil fuel terminal projects in the Columbia River? What would be the cumulative adverse impacts to Chinook salmon from the increased risks of an oil spill especially given the treacherous conditions that can exist at the Columbia River Bar which is also known as the "Graveyard of the Pacific?" Having spent over a decade studying the impacts of the EXXON Valdez oil spill in Prince William Sound on sediment chemistry and shellfish populations in the sound (reprints available on request) as a Research Fishery Biologist at the Auke Bay Laboratory of the National Marine Fisheries Service I am very aware of and sensitive to the impacts of a major oil spill on fish and shellfish populations in the marine environment.

Thank you in advance for taking my concerns into consideration.

Sincerely,

Charles E. O'Clair, Ph.D.

Subject: Tesoro Savage oil terminal at the Port of Vancouver

In Response:

I've attended the hearings and listened to the arguments for and against. My conclusion is that the Tesoro Savage oil transshipping terminal at the Port of Vancouver is not a good fit for the Clark County community. I also believe that there are better options for use of the port's property. Clearly, unrefined oil is ugly, dangerous stuff; the safety concerns are real. The environmental damage and air quality impact are also serious matters arguing against the proposed terminal. Finally, the 42 acres in the port's lease represent prime real estate with access to ocean, rail and highway transport. The port's soon to be completed rail expansion (47 miles of track inside port boundaries) will give it state of the art transshipping capacity and make the port space targeted for the oil terminal easily marketable for processing and transshipping other products and commodities.

The state should not approve the Tesoro Savage oil terminal. Our community and state will be ill served by having it here. There are clearly other option to provide the jobs, taxes and port revenue claimed as the terminal's assets.

Respectfully,
Ronald Morrison

Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

Lorraine Sherwood

Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you for your attention to and consideration of my concerns regarding this extremely important matter.

Sara Darby

Subject: Tesoro Savage Petroleum Terminal, Vancouver, WA Concerns

Dear Stephen Posner:

My name is Emily Kohring and I am a San Juan County resident (and/or property owner).

Our County relies on our tourism-based economy where our resident orca whales are an economic driver. I am concerned about the potential impacts from the proposed Tesoro Savage Petroleum Terminal LLC in Vancouver to the health of the Southern Resident Orca Whale.

Please thoroughly study the following: What would be the adverse impacts from the proposed crude oil transport terminal to the Southern Resident Orca Whales that spend time at the mouth of the Columbia River where it is presumed that they are feeding on upper Columbia and Snake River Chinook salmon?

What would be the adverse impacts to Chinook salmon from the construction and the on-going operation of the proposed Tesoro Savage Petroleum Terminal LLC and associated rail lines, docks, ship loaders, storage facilities, conveyors, and equipment?

What would be the cumulative adverse impacts to Chinook salmon from all the proposed fossil fuel terminal proposals within the Columbia River? What would be the cumulative adverse impacts to Chinook salmon from the increased vessel traffic associated with the Tesoro Savage Petroleum Terminal LLC and all other proposed fossil fuel terminal projects in the Columbia River?

What would be the cumulative adverse impacts to Chinook salmon from the increased risks of an oil spill especially given the treacherous conditions that can exist at the Columbia River Bar which is also known as the "Graveyard of the Pacific?"

Thank you for your time.

Respectfully,

Emily Kohring
