Q1. **Name** Gary Englund

Q2. **Email** gbe14@yahoo.com

Q3. **Are you part of an Agency or Organization?** No

Q4. **Share any comment**

I don't understand why we need more electricity generation in our county. The John Day Dam has 4 open generators shafts in the dam that don't have armatures in them to produce electricity. WHY???? Out of the 20 shafts at the dam, 16 are working generators and they only have half of them running daily. Why???? And you want to add more generation!!!!!! It's all about money and who is pocketing it?!?!?!?!? Corruption at it's best. Government at its best and people (us) living next to the site have to deal with it for a long time?!?!?!?!? Another thought to think about is if you made our electric rates half what the current rate is, you would have fewer people bitching about it. Did any of you ever think about that!!!!!!!!!!!! That is called buying us off. I would accept that. I know common sense has been dreamed unconstitutional and demeaning but maybe someone might wake up and start doing things right. Thanks for reading.
