Q1. **Name** Fred Froehlich

Q2. **Email** fred.fro@hotmail.com

Q3. **Are you part of an Agency or Organization?** No

Q4. **Share any comment**

I propose that large wind and solar projects be required to keep an account of money large enough to replace superfund cleanup costs of their project. This amount would need to be increased over time to account for inflation. Also, the solar project should require an underlayment of nonpermeable and impenetrable material to protect the soil under the project from contamination.
