Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Josephine Hadlock-King 40 Windship Dr Port Townsend, WA 98368-9545 johadlock7@hotmail.com

While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mx. Leonard Bordeaux 3803 NE 113th St Seattle, WA 98125-5740 bordeauxlen@gmail.com

External Email Dear EFSEC Members, As a concerned citizen, I support responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. It makes no sense to repair the climate while killing that which we are trying to save. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I'm concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. andrea adams

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mr. Larry Franks
24001 SE 103rd St Issaquah, WA 98027-8325 larry.fish.franks@gmail.com

Subject: Washington's Biodiversity and Cultural Resources Need You to Protect Them (and us)

Has attachment? False

External Email Dear EFSEC Members, As a concerned voter who is committed both to the preservation of our native species and ecosystems and to reducing global warming, I support responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, I know that it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Dr. Linda Carroll 215 W Waverly Pl Spokane, WA 99205-3178 lindalouise701184951@yahoo.com
