Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. Research shows that intact ecosystems are the most important aspect to preserve to offset climate change and support a healthy planet. We must dispel our ignorance and greed and realize that destruction of nature is destruction of ourselves. Common sense and common care is essential as we realize we share common ground with all of nature. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Nicole Martel 14207 130th Ln SE Yelm, WA 98597-9257 nicole@happinature.com

External Email Dear EFSEC Members, I am writing as a concerned citizen to once again express my support for long overdue and responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. This is a humungous failure in human logic and common sense, and not at a level of intelligence that should be within Washington's citizen representatives and members of the EFSEC. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Do not allow corporate distractions and political corruption to interfere with this immensely important issue. Thank you for considering my comments. Sincerely, Mr. Patrick Conn 22018 126th Ct SE Kent, WA 98031-9669 Nvr2L82ConntactMe@comcast.net

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mrs. Cheri Kunz
16109 210th Ave NE Woodinville, WA 98077-7738 Cheri_Kunz@Msn.Com

Subject: Please: Protect Our State's Biodiversity and Cultural Resources!

Has attachment? False

External Email Dear EFSEC Members, I am a concerned citizen writing to express my support for responsible, clean energy development in our state. I see the urgent need to curb our fossil fuel reliance and to fight climate change, but it's important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about potential impacts on cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from his directive. These resources help maintain Washington's ecological and cultural integrity. EFSEC faces pressure to compromise important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the governor. Our state's valuable cultural and biological resources must not be traded for clean energy goals. I urge EFSEC to keep with its original recommendation, which aligns with the principles of responsible clean energy development and biodiversity. Thank you for considering my comments. Sincerely, Mr. V. A. Maxwell 930 S Cowley St Spokane, WA 99202-1275 v3amax@gmail.com

EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mr. Dan Schneider 814 NE 84th St Seattle, WA 98115-4217 dlschneiderx@outlook.com

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mr. Stephen Zettel 25 Katt Ct Sequim, WA 98382-7391 hakuchi9@icloud.com

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mr. Bob Gush
9100 NE 17th St Vancouver, WA 98664-2495 bob.gush@gmail.com

These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. Can't the spiral type of wind turbines be built instead of the whirling, invisible blade type? We really can't sacrifice state endangered ferruginous hawks to the better good. We need to think harder and not rush into a big mistake, which is the usual procedure when money pressure gets too much priority. We never go back and really fix our mistakes, no matter how grave. The wind farms are an example of trying to fix a previous mistake with a new mistake. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. External Email Dear EFSEC Members, I am not a radical environmentalist, but I am a concerned citizen writing to encourage EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. I absolutely support responsible clean energy development in our state, and recognize the urgent need to reduce our reliance on fossil fuels and combat climate change. However, not at any cost; our state's biodiversity and cultural heritage need to be protected and preserved. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. To make the case that other development has impacted a species within a specific area, and use that as justification to continue other development and energy projects within the same area/range is disingenuous as well as irresponsible. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for your time. Sincerely, Mrs. ThuyTien Luong 118 Whites Ranch Rd Lyle, WA 98635 snluong@yahoo.com

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Lisa Cohen
754 Tillamuk Dr La Conner, WA 98257-9611 lisa.macek.cohen@gmail.com
