Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Dianna Macleod 3513 Wildes Rd Clinton, WA 98236-9317 dmacleod@msn.com

In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mr. Steven D Gary
5124 S Graham St Seattle, WA 98118-2939 gramgary@earthlink.net

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. One solution to not building wind or solar in important habitat is to put solar panels on posts over every parking lot in the country. Two problems solved in one shot: The energy crisis would be well on the way to being solved, and shade for everyone to park in. Covering every parking lot would get us a lot of power without taking any additional land. Parking lots are also heat island culprits. Adding much to adverse heat problems we're having. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Please redirect the funds that would go towards wrecking important habitat into building solar over parking lots and other structures. We can't afford to trash more land. Thank you for considering my comments. Sincerely, Mrs. Lynn Putnam 11544 SE 83rd St Newcastle, WA 98056-9111 pdx.elg@gmail.com

These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Jennifer Fairchild 4809 54th Ave S Seattle, WA 98118-1516 fairchildjl@gmail.com

Subject: Please ... Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Rosemary Ross 910 Cherry Heights Rd Apt 120 The Dalles, OR 97058-1045 rosie.94ross@gmail.com

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mr. Ben White
20013 NW Cedar Acres Dr Ridgefield, WA 98642-5929 bengwhite@icloud.com

Subject: Please Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I fully support responsible clean energy development in our state to reduce our reliance on fossil fuels and combat climate change, but it is EQUALLY important to protect our state's biodiversity and cultural heritage. It's frustrating to learn that about the potential impacts to cultural sites, priority habitats, habitat corridors and species like the Ferruginous Hawk which would result because of Governor Inslee's May 23rd Letter of Direction to EFSEC. As I'm sure you are aware, these resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC should not be under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. Therefore, I hope that EFSEC will do the right thing and adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Governor Inslee has really let us down with his complete disregard for cultural resources and biodiversity. Thank you for your time. Sincerely, Ms. Charrie Janzen 11232 Dayton Ave N Seattle, WA 98133-8611 cgjanzen@gmail.com

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Miss Uru Schilg
