Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, Please read this important message. I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Mrs. Clarissa Felling 4806 18th Ave SE Lacey, WA 98503-2652 cfelling635@hotmail.com

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am concerned about the Governor Inslee's May 23rd Letter of Direction to EFSEC and ask that you please adhere to the original, science-based recommendations put forth in your April 29th letter. I know there is an urgent need to reduce our reliance on fossil fuels and combat climate change. However, we are also experiencing a biodiversity loss crisis. Biodiversity loss and climate change are mutually reinforcing challenges that must be addressed together, but too often climate change policies are decoupled from biodiversity considerations. Governor Inslee's May 23rd Letter of Direction to EFSEC has the potential to negatively impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk. These sites, systems, and living creatures are essential to maintaining the ecological and cultural integrity of our state. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not compromise our state's cultural and biological heritage. I ask you to please adhere to your original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you. Sincerely, Mr. Joshua Morris 332 Martin Luther King Jr Way E Unit B Seattle, WA 98112-4855 josxuo@gmail.com

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Reverend Sophia Keller 851 SW 127th St Seattle, WA 98146-3124 keltiawind@gmail.com

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Julia McLaughlin 16740 Dodd Ln SW Rochester, WA 98579-9588 sherlocksmom@outlook.com

External Email Dear EFSEC Members, I am writing to express supporting responsible energy development in Washington State. Planet Earth is in a state of flux expedited by its over populated human inhabitants using up resources that cannot replenish with the ever growing demand for more to satisfy growing numbers unabated. Climate change is an oxymoron and not feasible in light of continuing status quo of Earth Human inhabitants contributing to its peril. Letter of Direction to EFSEC. Worrying about potential impacts to cultural sites, habitats, habitat corridors, species in general sound good at first, but having lived in Washington for over 60 years now, Long time witnessing increasingly disregard for natural resource recovery, preservation of habitats, species, waterways comes too late. Resources essential to maintaining ecological and cultural integrity in Washington State for what purpose if human behaviors are not going to change? The numbers of people who go out of their ways combating damages humans continue to practice are honorable to say the least but its not enough to save Mother Earth our only home. We are loving her to death for the bottom line: Profit above all else. Regards, Sincerely, Ms. Kari Ann Olson 1911 E Eaton Pl Seattle, WA 98112-2927 the4hrgardener@outlook.com

Subject: Protect Washington's Biodiversity and Cultural Resources

Has attachment? False

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage.

Advances in renewable energy should not come at the expense of our natural environment or the world treasured by the indigenous people who inhabited these lands long before colonizers from Europe set foot on their shores.

EFSEC cannot bow down to political or business interests and compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Dr. Kathleen Saul 3103 31st Ct SE Olympia, WA 98501-3917 kmsaul@comcast.net

External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. External Email Dear EFSEC Members, I am writing as a concerned citizen to express my support for responsible clean energy development in our state. While I recognize the urgent need to reduce our reliance on fossil fuels and combat climate change, it is equally important to protect our state's biodiversity and cultural heritage. In reviewing Governor Inslee's May 23rd Letter of Direction to EFSEC, I am concerned about the potential impact to cultural sites, priority habitats, habitat corridors, and species such as the Ferruginous Hawk that would result from following his directive. These resources are essential to maintaining the ecological and cultural integrity of our state, as highlighted by recent investments in biodiversity. EFSEC is under pressure to compromise critically important recovery efforts for a state-endangered species. It is crucial for EFSEC to uphold the science-based restrictions put forth in your April 29 recommendation to the Governor. Achieving clean energy goals should not come at the expense of our state's valuable cultural and biological resources. I strongly urge EFSEC to adhere to its original, science-based recommendation, which aligns with the principles of both responsible clean energy development and biodiversity conservation. Thank you for considering my comments. Sincerely, Ms. Sue Parrott
121 Bear Creek Ln Bellingham, WA 98229-9349 parrottdv@yahoo.com
