Thank You  
Cindy Wiedmann

Dear Governor Ferguson,

I am writing as a concerned citizen of Sedro Woolley to urge you to oppose the proposed Bess Hanson Creek battery storage facility. For over a decade, our community has prioritized the restoration of salmon habitat, a vital effort for our environment and local ecosystem. The placement of a battery storage facility in this rural area is incompatible with these conservation goals and poses significant risks to our community.

As a resident within the five-mile radius of the proposed site, I am deeply concerned about the potential for catastrophic incidents, such as fires, which have occurred at similar facilities across the country. Examples are the Vistra Moss Landing battery facility in Monterey County; Gateway Energy Storage Station in Otay Mesa, San Diego; Powen Energy battery facility in Melba Idaho. During a fire roads are closed, residents are evacuated and toxic fumes displace not only humans but endanger nearby farm animals and wildlife.

I respectfully request that you prioritize the safety and environmental integrity of our small community by preventing the development of this facility. Thank you for your time and consideration. I trust you will make a decision that reflects the best interests of Sedro Woolley and its residents.

Sincerely,

A handwritten signature in blue ink, appearing to be "D. J. Smith", written over a horizontal line.

Dear Governor Ferguson,

I am writing as a concerned citizen of Sedro Woolley to urge you to oppose the proposed Bess Hanson Creek battery storage facility. For over a decade, our community has prioritized the restoration of salmon habitat, a vital effort for our environment and local ecosystem. The placement of a battery storage facility in this rural area is incompatible with these conservation goals and poses significant risks to our community.

As a resident within the five-mile radius of the proposed site, I am deeply concerned about the potential for catastrophic incidents, such as fires, which have occurred at similar facilities across the country. Examples are the Vistra Moss Landing battery facility in Monterey County; Gateway Energy Storage Station in Otay Mesa, San Diego; Powen Energy battery facility in Melba Idaho. I am writing as a concerned citizen of Sedro Woolley to urge you to oppose the proposed Bess Hanson Creek battery storage facility. For over a decade, our community has prioritized the restoration of salmon habitat, a vital effort for our environment and local ecosystem. The placement of a battery storage facility in this rural area is incompatible with these conservation goals and poses significant risks to our community.

As a resident within the five-mile radius of the proposed site, I am deeply concerned about the potential for catastrophic incidents, such as fires, which have occurred at similar facilities across the country. Examples are the Vistra Moss Landing battery facility in Monterey County; Gateway Energy Storage Station in Otay Mesa, San Diego; Powen Energy battery facility in Melba Idaho. During a fire roads are closed, residents are evacuated and toxic fumes displace not only humans but endanger nearby farm animals and wildlife.

I respectfully request that you prioritize the safety and environmental integrity of our small community by preventing the development of this facility. Thank you for your time and consideration. I trust you will make a decision that reflects the best interests of Sedro Woolley and its residents.

Sincerely,

Stacey Rohweder
