Q1. **Name** Carol Cowling

Q2. **Email** carol.cowling@gmail.com

Q3. **Are you part of an Agency or Organization?** No

Q4. **Share any comment**

This project is not appropriate for the Badger Mntn. site. The sage grouse leks, the proximity to homes, the direct effect on wildlife and the shrub steppe, the degradation of Native hunting grounds and historic gatherings, replacing agricultural lands with solar panels - the list goes on. These large solar farms need to rethink what the future will hold with technology and advances in solar and other energy sources. Certainly the large, obtrusive panels will be refined into much smaller units (remember the size of the old computers?) This solar project will not help Douglas County residents. If solar is desired, put it on houses and buildings where it will be utilized, not out in rural America with fences and chemicals and large heat collecting panels. Lease holders did not renew their leases.
