**Re: Horse Heaven Wind Farm – Request for Special Meeting, Council Spec-5 Implementation**

Dear Acting Chair Brewster and Director Bumpus:

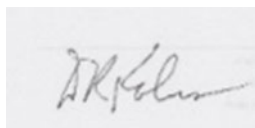

Horse Heaven Wind Farm Certificate holder Scout Clean Energy writes to respectfully request that the Washington Energy Facility Site Evaluation Council (EFSEC or Council) promptly hold a special meeting to consider and render a decision on implementation of site certificate agreement (SCA) mitigation measure Spec-5 Ferruginous Hawk to ensure SCA progress so that final Project design can move forward.

As you know, at the Council's August 20<sup>th</sup> regular meeting, EFSEC staff presented the Council with information regarding Spec-5 implementation. EFSEC staff requested Council input on the topic, but the Council failed to do so and made no further progress on the measure's implementation.

SCA administration cannot proceed until the Council issues its pending decision on measure Spec-5. That decision will require the Council to consider technical information and take time that is unlikely to be available during the upcoming September regular meeting. To continue the permitting process and avoid further delay, we request (1) that a special meeting be held within the next 30 days for this purpose and (2) that Acting Chair Brewster ensure that the Council actively and meaningfully deliberate such that a Spec-5 implementation decision can be rendered as soon as possible.

Thank you for your consideration.

Sincerely,

Dave Kobus  
Senior Project Manager  
Scout Clean Energy
