Cypress Creek Renewables developer of the proposed Carriger solar project <https://efsec.wa.gov/facilities/carriger-solar> in Klickitat County Washington has not released the manufacturer of their BESS. When it comes to BESS safety the manufacturer does not matter as they are all prone to thermal runaway, fires, explosions and release of deadly gases. It's not if a fire will occur it's when.

EFSEC will permit the BESS at Carriger solar. None of the EFSEC employees live near the Carriger solar BESS. They will never be in danger because they live near Lacey Washington hundreds of miles away.

Latest Tesla Mega Pack BESS fire. <https://www.ktnv.com/news/fire-breaks-out-at-townsite-solar-in-boulder-city> The same will happen here. The Klickitat County proposed BESS ordinance encourages BESS development by permitting them with a CUP. A BESS ordinance will not prevent a fire and possible loss of life. Prohibiting BESS is the only way to protect the safety, health and welfare of the people. Commissioners that is your duty. Will you do your duty?
