I vote no on the wind project. I live here and do not want to see huge wind turbines so close to town. We are nature lovers and frequently walk out in the surrounding area. It is beautiful That natural beauty deserves to be protected for its own sake, but more so as it is why we are drawn to this part of the state

I also very much object to a project going ahead that has such huge outpouring of negative comment by the people that live here. Such blatant disregard for what the people who live here want. I thought we had a government by the people and for the people. All of the boxes are being checked, as in the steps are being followed but it is a sham. No one is responding to what the public is shouting so loudly

Restore our faith in state government. We on the east side have all but lost faith
