Members of EFSEC:

Thank you for taking my comment. Much of the information from your organization about your Horse Heaven Project recommendations is not clear. Neither does it seem you are working with the people to make things clear.

Please take care to protect our environment and wildlife, including the ferruginous hawk. Please be very generous to provide recommendations for generous boundaries around nests. Protect our ability to fight fires. And not least, protect our people from plummeting land and housing values.

Big business, i.e. Scott, is NOT more important than our environment and citizens.

Thank you for considering my concerns.
Marilyn Dickenson
Benton County Resident
