Q1. **Name** Deb Bone-Harris

Q2. **Email address** debsthreads@charter.net

Q3. **Are you part of an Agency or Organization?** No

Q4. **Share any comment**

Please respect the citizens of the Tri-Cities, Washington regarding no wind farm south of Tri-Cities. I worked in the energy utility industry for 17 years and understand the impacts of this project. First of all we do not need any this eye soar in our back yard. The wind industry also kills golden eagles and other migratory birds. Let Seattle and Portland, Oregon build these I. Their back yards. We love our clean renewable hydropower, and our nuclear energy. Let us continue to work with Amazon for SMRs, and keep our dams. Wind power is not what the hype is all about. Letting some get rich while we have to suffer the look and nuisance of these. Just take this project somewhere else. Let us ramp up our nuclear power as a powerful baseload resource - one we can count on 24-7. Same way with our dams. Stop spilling the water and keep our clean renewable energy!! The salmon numbers are doing well with their returns and we have the removable spillway weirs and fish ladders that help the fish immensely. We need our agriculture, our transportation, and our clean way of living. Please don't muck it up with a wind farm.
