Q1. Name	Judy Guse
Q2. Email address	goosie1515@aol.com
Q3. Are you part of an Agency or Organization?	No
Q4. Share any comment	<p>It's all well and good that you are addressing the Ferruginous Hawk situation but what about all the other impacts that haven't been addressed?? A turbine wind project of this size has so many negative impacts starting with the turbine blades killing eagles, Ferruginous Hawks other birds, bats and insects that are extremely important to the environment. What about the habitat of all the animals and other creatures living on or near the HHH that will be completely destroyed along with the nests and dens of many animals, reptiles, owls and other birds from this gigantic wind project. What about the noise, infrasound and vibration from the turbines; how does that affect humans, animals, birds and other creatures that live on or near the HHH? Symptoms that are triggered by turbine vibrations and infrasound in people are (1) Sleep disturbance, awakening in a panic ("flight or fight" response). (2) Headache. (3) Tinnitus. (4) Ear pressure. (5) Dizziness. (6) Vertigo. (7) Nausea. (9) Tachycardia. (10) Irritability. (11) Problems with concentration and memory. (12) Panic episodes associated with sensations of internal pulsation or quivering, which arise while awake or asleep and (13) Visual blurring. What you can't hear, can indeed hurt you. How about the fire risk when aerial firefighting is impeded from stopping a fast-burning desert infernal that will surely destroy many homes, people, their farm animals, wild animals and other creatures in that area? It's simply hypocritical for declared environmentalists on the west side who claim to care about animals, birds, and other creatures, destroy the very habitat they need to survive! We don't need nor want unreliable, expensive, dirty wind power that destroys habitat for humans, animals, reptiles, birds, bats insects, etc. Hydropower is so much cleaner so not only protects the environment but also is reliable, safe and affordable. If those of you on the west side believe so much in wind power, you won't sound so hypocritical if you build those monstrosities on your side of the state. Thank you.</p> <p>https://wattsupwiththat.com/2025/12/22/wind-turbine-eagle-kill-secrecy-may-soon-end/ https://libertyonenews.com/interior-department-proposes-fine-after-wind-turbines-kill-bald-eagles/ https://www.youtube.com/watch?v=8NAAzBArYdw&t=01s</p>
