Q1. **Name** Dean Nester

Q2. **Email address** mt-rainier@hotmail.com

Q3. **Are you part of an Agency or Organization?** No

Q4. **Share any comment**

I continue to be opposed to this project for the following reasons: 1) these huge wind turbines will destroy the natural beauty of the Horse Heaven Hills which supports significant recreation (e.g., hiking, bird watching, hang-gliding, picnicking, etc); 2) the amount of electrical power that this project will actually provide the electrical grid will be significantly lower (i.e., ~20% of nameplate capacity) than what the project is stating due to the very-low capacity factor of wind and solar power generating equipment; 3) the watts per-acre power generation for this project is horribly low especially in comparison to nuclear power generation (1 new 1150-MW nuclear generating station would generate 4X more electrical power than this project but do it using only ~5% of the amount of land). This whole project is a scam to the people living in SE Washington State. Respectfully submitted (Dean Nester)
