Q1. Name	Stan Isley
Q2. Email address	stanisley@charter.net
Q3. Are you part of an Agency or Organization?	No
Q4. Share any comment	<p>Thank you, EFSEC Staff, for this opportunity to offer my comment. I am a longtime environmentalist, living in Yakima Washington for 46 years. I OFFER MY SUPPORT OF THE HORSE HEAVEN SPEC-5 FEHA MITIGATION PLAN, which I have just read in its entirety. I'm a life-long birder who is keenly supportive of protecting Washington's endangered Ferruginous Hawks, birds in general, and healthy natural communities that are threatened, like Washington shrub-steppe habitats. I am also urgently supportive of transitioning our state, country, and world, to clean energy generation sources, like wind and solar energy. I believe that EFSEC's review of the proposed Horse Heaven Hills wind and solar energy generation project has been responsible and adequate. Despite some opposition offered, often by local NIMBY commenters, to the Horse Heaven Hills Project, I fully support implementation of the Horse Heaven Hills clean energy generation project, with the protections and provisions required by EFSEC to protect shrub-steppe habitat, shrub-steppe obligate bird and animal species, and Ferruginous Hawks. Our entire human world requires us all to make the complete transformation of our energy supply to clean energy sources, like wind and solar. We MUST build this Horse Heaven Hills clean energy generation project, and many other similar projects, to stop global warming/climate change and maintain a planet that is inhabitable by us humans. There is no Planet B. Thank you for this opportunity to comment. Stan Isley, Yakima Washington.</p>
