**ADDENDUM TO
ENVIRONMENTAL IMPACT STATEMENT
Dated 1972**

**ENERGY NORTHWEST
COLUMBIA GENERATING STATION**

Energy Northwest provided a SEPA checklist to EFSEC on January 15, 2026 in support of the construction of two 16,500-square-foot warehouses on approximately 5.7 acres of previously-disturbed lands at the Columbia Generating Station (CGS) facility. EFSEC previously issued a Determination of Significance and Environmental Impact Statement (EIS) for CGS in 1972. EFSEC has determined that the proposed warehouse construction does not substantially change the analysis of significance impacts and alternatives in the existing EIS and, in accordance with Washington Administrative Code Chapter 197-11-706, issues this Addendum to the EIS to reflect the minor changes and new information added to the environmental review of CGS. Further information regarding the environmental review and anticipated impacts can be found in the accompanying SEPA Checklist and EFSEC Environmental Review and Staff Recommendation, which are also uploaded to the CGS project page on the EFSEC website at <https://efsec.wa.gov/facilities/columbia-generating-station>.

SEPA Responsible Official: Dave Walker

Position/Title: EFSEC Interim Executive Director

Phone: (360) 974-9522

Address: PO Box 43172, Olympia, WA 98503-3172
