RECEIVED

RE: EFSEC Docket No. 230002

Cascade Renewable Transmission, LLC

NOV 25 2025

ENERGY FACILITY SITE  
EVALUATION COUNCIL

Lead Agency for SEPA Threshold Determination.

The Cascade Renewable Transmission like proposal as described run through the Columbia River National Scenic Area and will, without question, generate significant environmental impacts. I stand opposed to a threshold determination of Non-Significance (DNS) under SEPA. The threshold determination by SEPA as the Lead Agency must be that the proposal as described is required to have a full environmental assessment and a Final Environmental Impact Statement under the State Environmental Policy Act.

I am also recommending to the Mayor and City Council of North Bonneville, Washington, that the City by formal action of the City Council, also demand that a Determination of significance be made by Washington State Facility Site Evaluation Council, requiring a comprehensive environmental impact statement.

Respectfully,

  
Pollard Dickson

CC: Mayor - City Council of North Bonneville, Washington
