Subject: Cascade Renewable Transmission project
Date: Thursday, November 20, 2025 11:05:00 AM

External Email

I am Tyler Smith, Vice President of Ironworkers Local 29. I am writing in support of the Cascade Renewable Transmission project.

This project will provide increased electrification of homes and increased economic development with good, family wage jobs.

The underwater transmission line will convert from AC to DC, then back to AC once it reaches the end of the line, removing EMF issues affecting the ecosystem. This is faster and safer compared to traditional overhead transmission lines.

Please support this project!

Thank you,

Tyler Smith
