Dear Mr. Kobus,

The Energy Facility Site Evaluation Council (EFSEC) received your LSU-2 Dryland Farming Management Plan submittal dated February 2026 as required to meet the Horse Heaven Site Certification Agreement (SCA) Article IV Plans, Approvals and Actions Required Prior to Construction, P. Dryland Farming Management Plan. EFSEC Staff concluded that the livestock management plan meets the requirements of the SCA.

This letter approves the Horse Heaven Wind Farm LSU-2 Dryland Farming Management Plan which includes coordination with property owners to control the movement of animals within the lease boundary during construction, operation, and decommissioning.

Sincerely,

David Walker

Dave Walker
Interim Executive Director
