Subject: Goldeneye battery storage

Has attachment? False

External Email I am opposed to this facility which is near waterways and homes. These facilities have and will at some point fail and cause either smoke or fire sending toxic fumes into the neighborhoods. These facilities toxic chemicals will also enter the groundwater and waterways harming people and animals in the area. This will not be good for our environment and will cause irreparable harm. Let's keep Washington clean and not bring in a potential environmental disaster! Respectfully submitted Rodney Jenny Sent from my iPhone
