Subject: Cascade Renewable Transmission line

Has attachment? False

External Email Honestly - this one is beyond ridiculous for what it does to our Columbia River, its history and for what? What is this high powered, aquatic disturbance for? If it's for the data center high energy usage then you are so out of line! I want to think there are so many environmental hurdles this one will never come about. However, if anything I see these days - money rules. Amazon, Microsoft, Google etc. will pay to have their way. I'll be watching this project among others and will fight it. My "bottom line" comment is this is beyond stupid for what it does to our Columbia River Gorge, fish, water temperature and disturbance! Don't allow it! Jeanne Poirier Cashmere, WA
