Subject: Thanks for your help to remove wind turbines in our area

External Email

Thank you for the three years of work on removing wind turbines in our area. This is a beautiful natural area with many animals such as hawks that depend on the freedom of the skies and the wind. We appreciate your years of work to protect this environment. We urge you to stick to your recommendation of removing half the turbines, and appreciate all the effort it took to get that. Please don't let the governor or anyone else bully you into destroying our area, especially in the name of conservation and "protecting the environment"!

Peace,
Tom and Ellen Tomaszewski
Richland, WA residents

Subject: C.E.A.S.E. INSLEE'S RENEWABLE SCAM
Has attachment? False

External Email

Hi, there is so much wrong with Inslee's renewable energy scam that it will ruin the future of the state and the citizens. With demand for electricity growing at a rate higher than predicted the current plentiful reliable affordable fossil fuel generated electricity would have a difficult time keeping up with the demand. With Inslee's grand renewable scam to eliminate fossil fuels and rely on wind/solar to supply the needed electricity it will NEVER happen. We will all be without electricity. The lack of transmission lines to deliver the electricity to the westside Inslee and his friends will suffer the most and that's good news. Renewable energy is so costly to go to 100% renewable will increase our utility bills IF they can deliver electricity to our homes. Inslee/PSE wants to eliminate Natural Gas forcing citizens to convert their homes to electricity which will place a greater demand on renewables and that will be disastrous. With a lunatic renewable dictator like Inslee our state is doomed. It is apparent that Inslee is a renewable dictator by the reports below. He is willing to violate the RCWs he helped draft to get his renewable scam in place. EFSEC followed Inslee's laws and reduced the HHH project, and he doesn't like it. He wants EFSEC to violate the laws and permit the HHH project. This is abuse of governmental power and state laws. Inslee used \$85 million taxpayer dollars to support private industry and build EV charging stations across the state. [Commerce awards over \\$85 million to expand electric vehicle charging across Washington state - Washington State Department of Commerce](#) Inslee DOESN'T drive an EV. What a hypocrite. He gave Kaiser Aluminum a private corporation \$5 million taxpayer's dollar to replace two old boilers. <https://www.spokesman.com/stories/2024/may/22/washington-state-is-giving-5-million-to-a-massive-/> Kaiser Aluminum is a billion-dollar corporation and should not receive any taxpayer's money. Does Inslee receive some type of financial benefit for supporting private industries? Give the tax dollars back to the citizens. Every eastside county and citizen are in Inslee renewable crosshairs. We are just renewable collateral damage to Inslee. Greg Wagner C.E.A.S.E. CITIZENS EDUCATED ABOUT SOLAR ENERGY

Please stop this terrible idea to put up wind turbines and solar generation project. Neither of the types of energy generation are needed. Also both of these projects have such a short life span it would be ill advised. The amount of pollution generated building turbines is terrible. People in this area Do Not want this to happen. Lastly they will cause terrible sight pollution. If they are truly needed have them built somewhere in Western Washington so that the people that seem to back this government boondoggle can admire how they look and how many birds will be killed. The wind is more consistent coming from the west also.

Sincerely
Todd Cox

Subject: Inslee External Email IGNORE recommendations for windmills Maintain Fire safety and Kill less
There would be no windmills if everyone was aware of the hundreds of gallons of oil each one takes and the maintenance intervals to change it. The cost benefit analysis is off the charts bad business and the environmental impact statements are obviously political because of disposal impacts are also environmentally catastrophic.
Respectfully / Kip Daly

EFSEC, you followed Inslee's law RCW 80.50 and made the correct decisions for Horse Heaven Hills project. Are you willing to violate the laws you are required to abide by in order to please Inslee. The laws are to be followed by all Washingtonians including Inslee. Especially Inslee. A state judge certified your decision. Does Inslee have the right or power to override that decision? NO! Not without a court order. Do not change your decision. STAND YOUR GROUND. Respectfully, Greg Wagner C.E.A.S.E. CITIZEN EDUCATED ABOUT SOLAR ENERGY

Thank you for their 3 years of hard work on the wind turbine farm planned for the Horse Heaven Hills. Please to stick to your recommendation which removes half the turbines. Governor Inslee Is unilaterally making a decision contrary to yours, and putting political pressure on you to reconsider.

Sincerely,
L. Craig Swanson

Thank you for your service and please do not let Inslee destroy the hhh. Even the last recommendations were too much for the area but putting those turbines in residential areas like this would be a total disaster not only for the humans but for the wild life and the environment.

This breeding pair is right in its path and have been there several years, we need their hunting skills out here and with no ability to safely fight fires if the turbines don't kill them the fires will destroy their habitat and make insurance impossible to get at a reasonable rate out here if it is available at all! Many companies are already deciding they will not insure out here!

Subject: Wind Project External Email Please stick to your proposal for the people in the Tri-City community.
Don't let Insley push you into changing your decision just to help him tout his legacy of being this Big Clean
Air/Energy producing State Governor czar at the expense of the people. It's about time the West side of the state
steps up and takes not only some risk on their side of the state but loss of their land, wildlife, and choices. After
all, they benefit without giving up anything. Better yet... Stop the whole wind project! Send it west! Helen
Burke

Please stick to the modified bill you have recommended for the scaled down wind turbines. It's vital to protect the areas that you have accounted for.

Thank you,
Linda Wilson

I want to thank you for your 3 years of work to get to your current suggestions for the wind farm.

I urge you to IGNORE Jay Inslee ...and stick to your recommendation... of removing half the turbines.

Sincerely,
Dori Rhynalds
Resident of the Tri Cities

External Email

Thank you for your recommendation of the wind turbines. Please stick to your decision despite statements from the governor. Please help save some of our birds, and nesting hawks, as well as aerial fire fighting. Tri-Cities is essentially a desert, and so dry, need help with aerial fire fighting, esp with wildfires. Wildlife Conservation professionals state more birds are destroyed by these wind turbines than reported as it's hard to calculate numbers as the turbines usually annihilate. Thank you for your time.

Jennifer Salois
Kennewick, WA

RE: Horse Heaven Wind Project

I am writing in support of Governor Inslee's request that EFSEC revise its recommendations on the Horse Heavens Wind Project.

The initial EFSEC recommendation to reduce the size of the project is inappropriate in light of our urgent need to expand alternative energy capacity.

I believe it is important to maximize clean energy opportunities. We need to go "all in" on the transition from fossil fuel energy to wind and solar. To that end, we should be pursuing the largest footprint possible in projects such as the Horse Heaven wind farm and other appropriate sites throughout the state.

In addition to wind power, much of our state, especially eastern Washington, is blessed with high solar potential. This, too, needs to be maximized. Some areas on the west side may be appropriate as well, such as rural areas of Lewis and Thurston counties.

Please do everything reasonably possible to maximize the Horse Heaven Hills wind project. Also, thank you for all the challenging work you have put in to these complex deliberations.

Thank you for considering my comments.

--

Hal Enerson
