Subject: C.E.A.S.E. Inslee's climate policies problem
Date: Wednesday, January 10, 2024 1:19:36 PM

External Email

Hi, it is obvious that Inslee lives in a delusional world. For him to say our state is stronger than ever it is just his self-righteous belief not supported by facts. He has no idea of the struggles Washington citizens face on a daily basis due to his lack leadership skills. He tries to divert the attention away from the citizens struggles by blaming big oil but it his climate policies that are causing the citizen's struggles. Our state is weaker due to him, and the future is bleak due to his climate policies. Due to his wealth his climate policies will never negatively impact his life or his family. It easy for him to ignore the truth and continue to destroy state and the citizen's future with his ridiculous climate policies. The citizens can only hope the next governor lives in the real world and recognizes that Inslee's climate policies are a detriment and takes corrective action. Greg Wagner C.E.A.S.E.
