Hi, watch this video of just small batteries on this bus on fire. Now imagine 2 acres of huge batteries on fire which are planned for the Carriger solar project with KC citizens living nearby. None of the Cypress Creek employees their CEO or Gov. Inslee or EFSEC employees will live near this disaster so why should they care about KC citizens. THEY DON'T. We are insignificant collateral damage to these heartless people. Greg Wagner C.E.A.S.E.
