Subject: C.E.A.S.E. CITIZENS EDUCATED ABOUT SOLAR ENERGY

Has attachment? False

External Email

My name is Greg Wagner founder of C.E.A.S.E. CITIZENS EDUCATED ABOUT SOLAR ENERGY. I and all the members of C.E.A.S.E. oppose renewable energy siting in Klickitat County or in any other east side county. Wind and solar generated energies are intermittent, unreliable, costly and not clean. Wind generated power supplies 10% to the grid and solar a mere .08% and that is when favorable conditions exist. To believe 80% of our energy will be supplied from renewables by 2030 is laughable and 100% by 2050 is impossible. The elimination of fossil fuels will never happen. Countries such as Germany, England, Australia and others who were ahead of Washington and dreamed of renewables wind/solar replacing fossil fuels sadly found out the hard way that it is impossible. Their citizens suffered through cold winters without heat and baked during hot summers without air conditioning. Renewables were unable to produce enough energy to supply their current needs and will never produce enough for future demands when their populations increase, and this will be the same for Washington. These countries are reverting back to fossil fuel energy. Wind and solar did not supply the basic energy needs. Inslee is not intelligent enough to realize this and continues to force useless renewables on the expendable east side citizens and we have had enough. To him east side citizens have no value, and we are just renewable collateral damage. Site wind turbines in Puget Sound and see how you like looking at them. Site a solar facility on the capitol lawn, on all state buildings. Site a solar facility on Bainbridge Island next to Inslee's home. Site solar facilities all around Seattle, Tacoma, Olympia and watch the citizen's protest. Leaders lead by example but with hypocrite Inslee's it's do as I say not as I do. His home is not 100% powered but renewables, he doesn't drive an EV, he doesn't have an electric boat. He flies around the world in fossil fuel powered jets, rides in fossil fuel powered helicopters, chauffeured in fossil fuel powered limos, consumes food prepared by fossil fuels. His carbon footprint is huge, yet he wants all Washingtonians to suffer without fossil fuels. The elimination of fossil fuels will destroy our state and country. Only lunatics like Inslee believes renewables are good for our state. None of his useless renewable plans will come true. He is destroying Washington and does not care. He is heartless and anyone who follows him is the same. Inslee is supporting communist China by promoting renewables considering all the raw earth minerals used to build solar panels comes from China as do all the solar panels. Inslee is destroying our state. China sells Inslee their useless renewables, so we won't have reliable affordable energy. China is building 2 coal fire power plants a month so they can they have cheap reliable energy which will make their country strong. The majority of these renewable corporations are foreign, are here for just the money and control of our energy. This places our state in a vulnerable position but Inslee doesn't care as he has this ridiculous save the planet renewable dream but in reality, it's a nightmare. Thank God Inslee is not running for another term. If hot air could produce energy Inslee could power the hold state. STOP Inslee's renewable nightmare. East side rural citizens do not want Inslee's nightmare. Greg Wagner
